It was fun to make it myself!  
An experiential workshop

# let's build a **stack-chan**

4/29(祝)PM1:00~  
参加費 X0X0 円  
推奨対象年齢：小学校高学年

Easy to color the body

using a smartphone  
Let's talk a lot!

After making  
You can talk in words using  
your smartphone.

I am a chatty AI robot  
Its name is Stack Chan!  
It's a super-kawaii robot

Hello!  
I am Stack-Chan! !  
nice to meet you

Easy to use AI experience!

Masking tape

Phillips screwdriver

assembly kit

Eco-friendly eco-friendly wood "MDF" is used as the main material.  
No glue required, most parts are assembled with masking tape and screws.

necessary tools

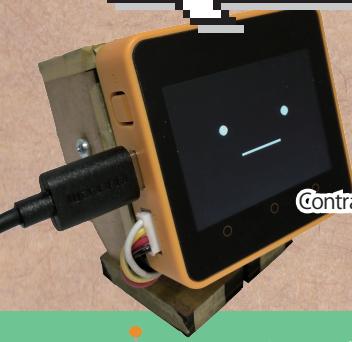

## What is this little **AI** スタックチャン !?

A palm-sized robot that utilizes the cutting-edge interactive AI "ChatGPT". It is small and has a relaxed atmosphere.

Contrary to his appearance, he is good at conversing in solid and natural Japanese, and is also good at answering questions in multiple languages.

The development team is mainly made up of domestic volunteers, so even beginners can use it with confidence.

Since it runs on USB power, you can often use your smartphone's battery or charger as it is, making it very economical.
